

Sanitizer

The Vrisimo Sanitizer allows nut growers to start the spring with a clean orchard. It turns small pruning material, grass and other organic matter into a fine mulch after harvest is completed. It comes in two sizes, has three knife options and is the perfect complement to flail mowers and shredders. The Sanitizer also helps control pests like navel orange worm in almond, walnut and pistachio orchards by destroying unharvested nuts and residual wood.

Performance

The Vrisimo Sanitizer's 250 HP dual drive gearbox provides excellent ground speed for thorough destruction of orchard residue. The Sanitizer is center-mounted, keeping your tractor in the middle of the row. Like all Vrisimo products, it is engineered for strength, toughness and long life.

SANITIZER SPECIFICATIONS

	SM2144	SM2120
Cutting Width	12'	10'
Overall Width	13' 10"	11' 10"
